## SUMMARY

- 30+ years experience working with creative teams and clients. I can grasp the scope of a project, assess timelines and budgets required, spot opportunities for spin-off projects, and I make sure the work is completed excellently and on time, if not early
- Lead and develop projects from concept through completion both with teams and solo
- Created pieces and directed projects for nearly every medium including:
  - Print projects with an extremely wide variety of technology and output
  - Websites - full-featured client-side development with strong server-side overlap
  - Working with Audio and Video Production for screens ranging from handheld devices to building-sized displays
  - Support for live presentations, including custom displays and game-show recreations (e.g. Jeopardy and Wheel of Fortune in corporate convention settings, et al.)
  - Creating novel of packaging and marketing: boxed gifts, business cards, etc.
- Strong collaborator. My favorite way of doing creative work is with teams who are able to combine their efforts to build pieces that none of them would have designed alone.

- Master-level skills with:

Adobe Photoshop	Adobe Illustrator	Adobe InDesign	Finale (Music Typesetting)
-----------------	-------------------	----------------	----------------------------

Top-level professional level skills with:

Adobe Premier	Adobe Audition	Adobe Acrobat
Various Word Processors	Various Spread Sheets	Adobe Animate (Flash)

- Skilled client-side designer with a strong understanding of server-side code, able to develop and modify code and interface extremely well with back-end coders
- Freelance Graphic Design business with, carrying 1-3 projects on my plate - dozens of websites, logos, print, and packaging projects produced over the years
- Using and teaching Adobe Photoshop and Illustrator since 1989
- World-class photo-composer
- Current faculty at the Community College of Vermont teaching most courses in Graphic Design
- Comfortable working in a wide variety of artistic styles
- I believe that all completed work should be done with future projects in mind. When satisfied clients return asking for new projects, one saves enormous amounts of time if the original pieces were built so that a library of resources has already been created
- Master-level music typesetter
- Several projects in different disciplines close to publications: Game Design, Choral Composition, and Tarot and Oracle Deck Design

## WORK HISTORY

- ★ 1990–present **Freelance Graphic Design** I'VE MAINTAINED A FREELANCE GRAPHIC DESIGN PRACTICE FOR MOST OF MY PROFESSIONAL LIFE.
